

Sore knees and a tight lower back? It might start at your feet.

The Story

When your feet aren't supported, your knees absorb extra stress, your hips compensate, and your lower back tightens to pick up the slack. The fatigue and soreness follows you the rest of the day, affecting everything from your mood to your sleep. Custom insoles are built to fit your actual foot shape, helping your body move the way it's meant to, instead of offloading the work up your skeleton.

How It Works

- 1. You're Covered:** OSF benefits provide one free pair of custom insoles to every Mission Partner.
- 2. Simple Process:** Complete a quick five-minute phone scan and receive your covered 2026 Hike Insoles, custom designed for your unique foot shape, in two weeks.
- 3. Ongoing Support:** After the first year, OSF benefits allow Mission Partners to purchase one pair of replacement insoles annually for just \$15.
- 4. Want Additional Pairs Before 2027?** That's easy with your member dashboard and exclusively priced for OSF Mission Partners.

Your comfort is guaranteed. If the fit isn't right, Hike will rebuild your pair for free.

IN THEIR WORDS

Hear what members are saying about their Hike insoles

99 For years I have been dealing with knee pain. The day I went to work with my custom insoles, I felt like a new man! Walking didn't hurt. I felt like I could actually run, and my knee pain disappeared!

99 I'm on my feet all day walking on concrete and asphalt. I have plantar fasciitis and had bought some store shoe insoles. They helped me, but with these insoles from Hike Medical, I can really feel the difference, and these are custom-made for my feet.
